

Whitepaper - WCS - published by: wcs:root : Sat Jan 18 18:13:43 CET 2020 #
World Compensation System (WCS) **Keywords:** #2020, #Blockchain, #Inter-
netOfValue, #RSK, #DeFi, #DeFiApp, #DFApp, #wcsDFApp

Classification: DeFi : EcoSystem : @rif_os : **Version:** 0.0.1 (2020-01-15)
Status: *in work*

Purpose

Simple. Eliminate money invisibility.

User-story

I dare you to throw out all your money, all your papers and coins
and individual national currencies, and start over.

Develop an international monetary system that is wide open, totally
visible, immediately traceable, completely accountable. Establish a
Worldwide Compensation System by which people would be given
Credits for services rendered and products produced, and Debits for
services used and products consumed.

Under the new Worldwide Compensation System, WCS, the transfer
of Debits and Credits would be immediate and totally visible. That
is, anybody and everybody could inspect the account of any other
person or organization at any time. Nothing would be kept secret,
nothing would be ‘private’

Everything would be on the system of Credits and Debits. Returns
on investments, inheritances, winnings of wagers, salaries and wages,
tips and gratuities, everything. The WCS would deduct 10 percent
of all earnings each year from the income of those *voluntarily re-
questing* such a deduction. Everyone in the society would be able
to observe who was choosing to offer the 10 percent for the general
good of all, and who was not. And everyone’s records would be open
to everyone else. And nothing could be purchased without Cred-
its. There would be no other negotiable currency. ([source:#CWG,
@realNealWealsh](http://ISBN))

Short-name: WCS, DeFiApp, wcsDFApp

Architecture

Concept

Create a World Compensation Ecosystem based on Decentralised Financial Applications.

Implementation: Operation System (including fs, dfs, time-shared applications)

wcsOS – linux based distribution

Layers: 1. Distributed peer-2-peer (P2P) Network (Blockchain based) 1. Dis-

tributed File system (dfsWcs) 1. Nodes are Servers 1. Servers 1. run System- and Users-services 1. route User- and System- interactions (transactions) 1. Users are Clients 1. Clients decide to participate or not (mounting/unmounting) as service suppliers in the network 1. Clients interact with other Clients 1. Clients request services from Servers (service suppliers) 1. Via Remote Procedure Call (RPC) returning values in JSON format 1. Clients transfer value-assets to single or multiple-users or services 1. Light-Clients connect and use the network only for short-time (SMS, PPP) 1. Value-assets are represented via Addresses in the Distributed File system 1. Clients and Servers interact via read/write file operations with eachother 1. Servers providing User-services are debted certain agreed amount per-use 1. Servers providing System-services are debted an agreed amount per-use, daily, monthly or yearly on donation basis

Network

Topology: Flower or Tree-of-Life (sacred geometry star 1:N, N:=6) *
https://en.wikipedia.org/wiki/Overlapping_circles_grid#Modern_usage

Nodes:

Full-nodes: store the complete history of command-blocks (analog to batch-files (a.k.a trans
 Light-nodes: store, validate and reconstruct environment from all nodes in local network (or

Local File-system

```
/ - WCS root Ecosystem
/commands
/dbin/ - Decentralised System services
/users/ - connected user addresses {publickey:addresshash:alias:inbox} (analog to /mnt)
/apps
/lang - implementation language specific files
/tools - Utility tools
/dapp/ - Decentralised User or Third-Party Applications (executable -- analog to /usr/bin)
```

Remote (distributed) File-system

```
/arch/dfs
/dapp/DeFi/ - Decentralised Financial Apps
```

Realisation

TCP/IP Server :port UNIX's "Everything is a File" -> (name:Address) - Network
 (distributed) File-System

Support Tools

- neo4j - Graph Database
- jslinux - Web-Browwer Linux
- 128-bit OS - 128-bit RISC OS
- quickjs - Embeddable Javascript engine

Refer to support tools.

Network Startup

```
$wcssStart &  
World Compensation System server (wcss) running  
Listening on port:280182
```

```
$wcssStatus  
Status: OK
```

Command, Services and Tools

- bin - Local commands, services and tools
- dbin - Distributed (Remote) user-commands and user-tools

Application Notes

- apps - Local commands, services and tools
- dapps - Distributed (Remote) User-services #### Digital signatures
